Huxley All-Weather Golf Course Tees

The new generation Huxley Premier Tee Turf provides a superb all-weather playing surface that will stay looking good all year round in almost any weather conditions, while requiring minimal maintenance.

Suitable for use as an extension, replacement or seasonal alternative to natural grass tees, helping spread wear and tear and reduce maintenance requirements, Huxley Premier Tee Turf eliminates the need for playing on badly worn natural grass surfaces or from unyielding and uncomfortable artificial mats.

Huxley Premier Tee Turf's exceptional pile density avoids the need for an infill such as Turfill®, sand or rubber crumb, so both installation and maintenance are simplified. Golfers can choose to play balls directly off the turf or from a standard tee peg inserted into the pile.

“ Our members enjoy playing from the Huxley Golf tees. It is the most realistic and innovative all-weather surface on the market and is an excellent low maintenance alternative to natural turf.”

Eoin Riddell (Course Manager, Royal Dornoch Golf Club)

Huxley All-Weather Practice Tees

Huxley All-Weather Practice Tees have been selected by many of the world's top golf courses as a high quality, attractive, low maintenance alternative to natural turf for practice areas and ranges.

St Andrews Links, Wentworth Club, The National Golf Centre at Woodhall Spa and the Celtic Manor Resort are just a few of the many Huxley Golf customers throughout the world who use Huxley All-Weather tee turf on their practice areas to ensure that golfers enjoy first class surfaces all year round.

Huxley practice tee surfaces are installed without the need for a Turfill®, sand or rubber crumb infill. Huxley Premier Tee Turf is designed to allow balls to be played directly off the pile or from a standard tee peg pushed into the fibres, while Huxley Nylon Tee Turf is a high performance surface for play without a tee peg, providing superb ball striking characteristics with minimal maintenance requirements.

“ The Huxley Golf tee turf plays similarly to grass without any of the associated wear and tear. Of great importance is that golfers enjoy playing on it. From my viewpoint, it ticks all the boxes.”

Kevin Mackay (Practice Centre Manager, St Andrews Links)

Huxley All-Weather Putting Greens and Golf Greens

Huxley Premier All-Weather Greens provide a superb facility for practising and fine-tuning your short game. Huxley All-Weather Putting and Chipping Greens are installed using our tournament quality putting turf, which is specially designed and manufactured to enable golf professionals and amateur golfers to practise and improve their short game on a true and consistent top quality surface all year round. Huxley Putting Greens can be installed indoors to allow coaching and putting analysis to continue during inclement weather conditions and also can be a successful addition to the golf shop for customers to try out new putters.

Huxley All-Weather Golf Greens are designed to receive a full golf shot realistically while also providing an acceptable and consistent putting surface for practice and actual play at any time of the year.

Both Huxley All-Weather Putting Greens and Huxley All-Weather Golf Greens require minimal maintenance and are ideal for golf clubs, golf centres, practice ranges and golf academies, as well as hotel and leisure facilities. Huxley Premier All-Weather Greens can be supplied and installed in a wide range of shapes and sizes, incorporating undulations and slopes as on natural grass greens, but without the time consuming and expensive maintenance requirements of natural turf.

“ Our Huxley All-Weather outdoor putting green is an essential part of the Quintic experience, enabling golfers to put our computer video analysis and indoor training sessions into practice in a real-life setting. A natural turf green would not be suitable for this purpose due to the high maintenance demands and variability of the surface, in particular over winter when we do much of our fine-tuning work with professional golfers and top tour players.”

Dr Paul Hurrion (Quintic Consultancy Ltd)

Huxley Golf Academies and Golf Courses

Huxley All-Weather Golf Academies are extensively used by schools, hotels, golf centres, national training academies and top coaching professionals, both indoors and outside, because they ensure top class playing surfaces all year round with minimal maintenance.

Huxley Golf was chosen by Golf Development Wales as the official supplier of all-weather surfaces at five state of the art regional Centres of Excellence including Celtic Manor Resort, venue for the 2010 Ryder Cup.

Huxley All-Weather Golf Courses are available from a single green with multiple tees to a full 18 hole layout. Huxley All-Weather Golf Greens and Tees combine to make a professional quality practice, coaching and playing facility for golf clubs, golf academies, hotels, resorts and educational establishments who require high playing standards all year round without the maintenance costs of natural grass.

Huxley Golf can plan, design and install the greens, tees and additional features, such as bunkers, to provide a top class golf facility for use all year round.

“ The short game centre at Celtic Manor Resort is a wonderful facility. The Huxley All-Weather surfaces are very realistic, great to play off and remain consistent irrespective of the weather or level of use. They are used primarily for short game coaching of the Welsh Elite and Development squads as well as by individual squad members. The result can only benefit the long-term development and success of Welsh golf.”

Nigel Edwards (Director of Player Development and Coaching, Golf Union of Wales and 2011 Walker Cup Captain)

Additional Quality Products from Huxley Golf

Huxley Golf offers a number of additional premier quality products designed to enhance standards on the golf course or practice ground. These are also popular at corporate events and exhibitions.

Huxley All-Weather Pathways look superb and are comfortable and silent to walk on. They are also extremely hard wearing and require very little maintenance. Carefully sited, Huxley All-Weather Pathways will relieve wear on natural turf areas which will not tolerate high usage.

Huxley Practice Cage Nets can be single, double or triple bay, freestanding or socketed and are specially designed and manufactured for commercial use. Huxley Practice Cage Nets are ideal for use at golf clubs and academies for coaching, practice, or warm up before play.

Huxley All-Weather Target Greens provide an attractive and inviting low maintenance target for golfers practising their short irons on ranges or practice grounds. Floating Huxley Target Greens are available in addition to in-ground installations.

“ We are very pleased with the improvements brought about by Huxley Golf’s All-Weather surfaces. The material is easy to lay and good both to look at and walk on, while requiring minimal maintenance. It is certainly appreciated by the many golfers from around the world who visit Carnoustie Links throughout the year.”

John Philp (Course Manager at Carnoustie Golf Links)
