

“ The Huxley Golf tee turf plays similarly to grass without any of the associated wear and tear. Of great importance is that golfers enjoy playing on it. From my viewpoint, it ticks all the boxes.”

*Kevin Mackay (Operations Manager, The Castle Course, St Andrews Links) National Golf Squads*

Premier All-Weather Surfaces for Golf

## Premier Tee Turf 2

A new generation all-weather turf suitable for golf course tees, practice tees and similar applications requiring a top quality, low maintenance playing surface.

Installed at the world-renowned St Andrews Links, Fife, Huxley Premier Tee Turf 2 (PTT2) offers users the following key benefits:

- Exceptional pile density allows installation without filler, minimizing maintenance requirements
- Balls can be played straight off the surface or from a standard tee peg pushed into the pile
- Suitable for installation by golf course staff with guidance from Huxley Golf
- Can be lifted for cleaning, renewal or repositioning to help spread the wear
- Hard-wearing, silent and comfortable underfoot – looks, feels and plays like natural turf

We have demonstration tees available for assessment and will be pleased to provide specialist advice and recommendations on request. The new generation

Huxley Premier Tee Turf 2 provides a superb all-weather playing surface that will stay looking good all year round in almost any weather conditions, while requiring minimal maintenance.

Huxley All-Weather tees have been selected by many of the world's top golf courses as a high quality, attractive, low maintenance alternative to natural turf and is suitable for use on the golf course, practice area or range as an extension, replacement or seasonal alternative to natural grass tees. Huxley Premier Tee Turf 2 will help spread wear and tear and reduce maintenance requirements, making a first class alternative tee, eliminating the need for playing on badly worn natural grass surfaces or from unyielding and uncomfortable artificial mats.

St Andrews Links, Wentworth Club and Walton Heath Golf Club are just a few of the many Huxley Golf customers throughout the world who use Huxley All-Weather Premier Tee Turf 2 on their practice areas or on the course to ensure that golfers enjoy first class surfaces all year round.

The minimum recommended width of a Huxley Premier Tee Turf installation is 12ft (3.66m), whilst overall length will depend on the particular application. For golf course tees a minimum 12ft x 12ft is advised, however alternative sizes are available upon request and greater lengths will help spread the wear further across the surface. However, users will find that the wear rates and maintenance requirements of Huxley Premier Tee Turf 2 are greatly reduced compared with a natural grass golf course tee or practice area.

Looking and feeling just like natural grass, Huxley Premier Tee Turf 2 has exceptional pile density, removing the need to use a Turfill®, sand or rubber crumb infill to pack the spaces between the fibres. The result is a very low maintenance surface, which allows balls to be played directly off the pile or from a standard tee peg pushed into the fibres, just like natural turf, and looks, feels and plays just like the real thing.

Because it needs no infill, Huxley Premier Tee Turf 2 is suitable for installation by golf club greenkeeping staff on a suitably prepared base, with guidance from Huxley Golf. The absence of an infill also makes it possible to lift the surface for cleaning, for rotation to help spread the wear or for eventual replacement.
